PRODUCT DESCRIPTION

Designer: Ferruccio Laviani

Supernova Pendant Light by Foscarini

Inspired by space and the newly born star, the Supernova pendant light was designed by Ferruccio Laviani in 2000. Still a current and trend-setting light, this pendant is made from 7 pairs of aluminium discs, formed into a sphere to evoke spatial elements. The light source sits in the middle of the globe, being reflected off the multiple discs in all directions.

The Supernova pendant produces a glare-free, diffused glow that is far-reaching, being good for illuminating the entire room. This pendant light is available in a more natural aluminium colour or a vibrant fuchsia finish. Wonderful for homes and commercial spaces, this light is perfect for big, open spaces and for lounges, kitchens, dining rooms and more, making a real statement!

This pendant is available in an extra large size for even bigger interiors. Please [contact us](#) for more information and pricing.
