PRODUCT DESCRIPTION

Designer: Neil Poulton

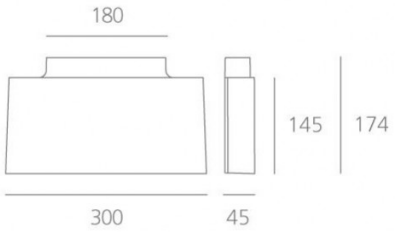

Artemide Surf 300 Wall Light

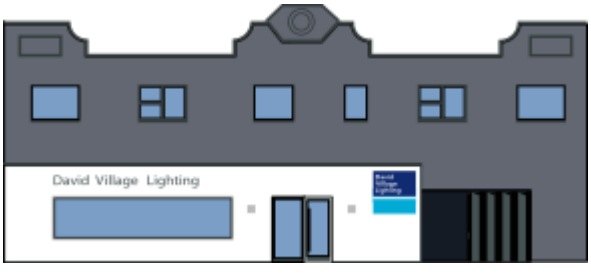

The Artemide Surf Wall Light, designed by Neil Poulton for Artemide, retains the same refined, sculptural form that defines the collection. Its slim, curved metal body sits close to the wall, creating a smooth, wave-like profile that feels both subtle and architectural. Its white finish allows the fixture to blend effortlessly into a wide range of interiors while still offering a sense of quiet sophistication.

When illuminated, the Surf casts a soft, indirect glow upward that reflects gently across the wall. This creates a cosy, atmospheric effect with tonal depth, ideal for injecting visual interest into spaces. The Surf Wall Light works particularly well in residential settings such as living rooms, bedrooms, and hallways, as well as in hospitality environments like boutique hotels or restaurants, to enhance the space with atmospheric lighting.
