PRODUCT DESCRIPTION

Designer: Ross Lovegrove

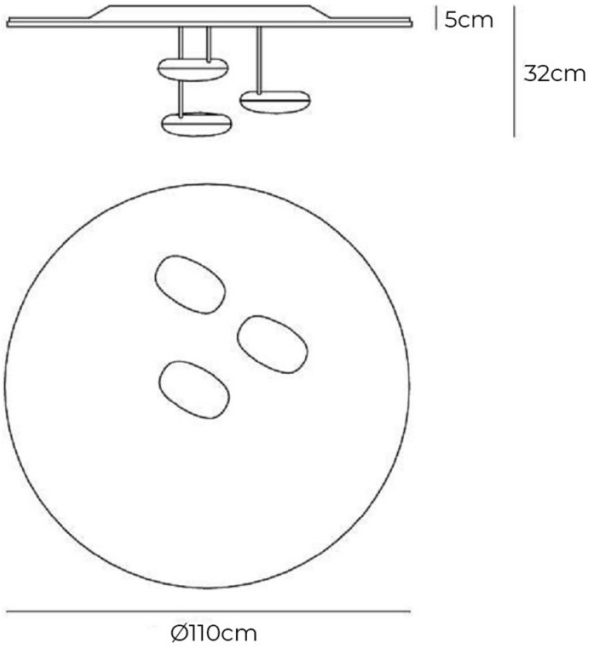

Artemide Droplet Ceiling Light

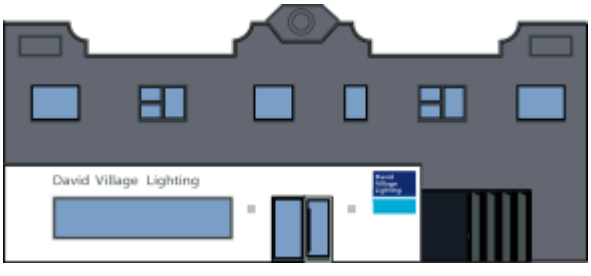

The Artemide Droplet Ceiling Light is a design by Ross Lovegrove, and depicts a moment frozen in time. Droplet consists of a wavy aluminium surface that is illuminated by three steel pebble-like elements, adding a futuristic touch to your interior. The design is similar to the ripples created when you throw pebbles into a water surface, and Lovegrove's influence is clear, as he takes inspiration from the logic and intelligence found in nature.

Droplet combines organic forms with high-quality lighting technology, providing functional indirect illumination. This striking ceiling light is a bold addition to your entryway, reception area, foyer or other contemporary environment. The lighting solution is also available in a **mini version** with only one light source, that can be used on either your wall or ceiling.
