Artemide

Mercury Ceiling Light by Artemide

Considered a masterpiece, the Mercury collection was designed by Ross Lovegrove for Artemide. Lovegrove received the Red Dot Design Award and the Good Design Award in 2008 for the collection. The family includes ceiling and suspension lights, each available in two sizes.

Mercury has a number of polished aluminium globular shapes, or pebbles, hanging from an aluminium disc. The pebbles will interact with the natural light, when the light is not on, with the light bouncing off each surface and the movement in the room being reflected on them. The light becomes a sculptural object in any setting, and can become captivating even when not in use. Lovegrove draws inspiration from nature and the simplicity that comes from it.

The Mercury ceiling light is available as a Standard size (10 pebbles) or the Mercury Mini (5 pebbles). Both have an integrated [LED version](#), where you can also select your preferred colour temperature (2700K or 3000K). The Mercury family also includes a suspension light, again in two sizes and halogen or LED version.

Designer: Ross Lovegrove

IP Code: 20

Dimming: Dimmable via mains phase dimming.

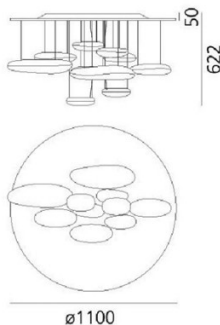

Dimensions:

Standard - Ø110cm, 62.2cm H, 5cm recess depth

Mini - Ø70cm, 56.2 cm H

Colour: Polished chrome 1396110A

Standard

Mini
