FLOS

Wan Ceiling/Wall Light by Flos

The Wan ceiling/wall light, designed by Johanna Grawunder in 2005, is a compact, contemporary and directional light designed to be used in multiples. The Wan wall and ceiling light is named after the Japanese for "bowl", which is reflected in its curved profile and petite size.

With a body made from aluminium the Flos Wan ceiling/wall lamp is available in two colour finishes, white or black. The Wan wall/ceiling light provides a focussed, glare free glow thanks to the clever design of the diffuser, making it perfect for task lighting in a study or living room, or in a kitchen or dressing room as general lighting.

The Flos [Wan collection](#) also includes a fully recessed model, semi-recessed model and a pendant light.

Designer: Johanna Grawunder

IP Code: 20

Dimming: Dimmable via mains phase dimming

Dimensions:

Ø11.5cm

8.9cm height

Ø5cm base

Colour: White

Black
