PRODUCT DESCRIPTION

Designer: Vicente Garcia Jimenez

Foscarini Fields Wall Light

The Foscarini Fields Wall Light was designed by Vicente Garcia Jimenez after he was inspired by satellite views of the earth. This wall light is stunning and is based on a modular design, with 3 distinct parts that can be bought individually. Each version, Fields 1, 2 and 3 has its own design, characterised by a rectangular and graphic shape. You can buy multiple of each one to construct how you want it on the wall, having the ability to create a unique light feature.

The Fields wall lamp can also be bought as a pre-constructed design, combining all 3 elements in one wall light. This light is available in 2 colours, a subtle white or vibrant orange, to create the effect you want. The design means the light is both diffused and reflected, producing a bright yet soft glow, perfect for many spaces. Use as a piece of lighting artwork or as a functional light in multiples or alone in both domestic and commercial settings.
