BESTLITE

BL5 Wall Light by Bestlite

Designed in 1930 by the renowned Robert Dudley Best, the BL5 wall light is an iconic light that is internationally acclaimed. Seen today in exhibitions in modern London museums, this wall light has stood the test of time because of its elegance and versatility. The wall lamp has an adjustable height as the arm slides up and down the tubular wall bracket. The arm can also swivel and bend which holds a beautiful lampshade that also can be tilted.

The BL5 wall lamp is stylish and timeless and its flexibility means you can direct the light where you need, whether you need it as a reading light or illuminating a corner. The diffused light also creates a soft glow so you can create a cosy atmosphere. This wall lamp looks lovely in lounges, bedrooms, offices and lining the walls in corridors and hallways. This light is available with 3 base colours and different shade colours so you can match it to your design scheme. Buy several of the same finish for consistency or buy in different colours to create subtle variety in the room.
