PRODUCT DESCRIPTION

Designer: Verner Panton

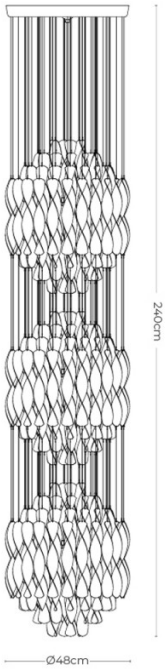

Verpan Spiral SP3 Pendant

Designed by Verner Panton in 1969, the Spiral SP3 Pendant is a striking expression of the designer's fascination with colour, form, movement, and light. The largest piece in the **Spiral Collection**, the SP3 features three cascading clusters of silver/ gold spirals suspended from a matching canopy by discreet nylon strings. The intricate twists add a sense of movement, reflecting light and their surroundings to create a shimmering effect.

When illuminated, the SP3 produces a comfortable ambience. The spirals conceal the light sources for a glare-free glow, while diffusing and reflecting light to create a captivating play of light and shadow. The pendant's large size makes it suitable for rooms with high ceilings, entrance halls, and stairwells. In commercial spaces, it can be used as a statement piece in hospitality settings, filling the room with a welcoming ambience while providing a captivating sculptural display.
