## PRODUCT DESCRIPTION

**Designer:** Louise Campbell

### Collage Pendant Light by Louis Poulsen

The Collage pendant was created by Louise Campbell, a designer who uses daylight as an influence in her work with lighting. She notes that the difference between artificial and natural light is that in nature we have one light source which we never directly look at. This thinking informs the Collage pendant light as the light source is concealed by three layers which have a beautiful pattern that lets the light escape in interesting ways.

Just as in nature, the light has a warm glow that is observed through obscurity, creating delicate patterns of light and shadow. The pendant light is available in 2 sizes, the smaller Ø450 and the bigger Ø600, so you can find the right fit for your space. The pendant also emits a downward light which looks good hung over tables and surfaces, making it a perfect lighting solution for kitchens and dining areas. Suitable for both domestic and commercial settings, this pendant lamp is an elegant and decorative light that is chic and stylish.

The Collage 450 emits a constantly changing light, the 3 layers encourage a beautiful play of light between the shades, constructed using 3 pieces of laser-cut, Matt extruded acrylic.

Suitable for applications in conference rooms, retail environments, over dining tables, lounge and sitting areas.

The Collage Suspension creates atmosphere, and is at the same time changeable. The pattern which is staggered on the shades made out of 3 layers of acrylic, gives the fixture an almost endless combination of patterns.

Colour: Matt White

Suspension - natural anodised aluminium  
Shade - laser-cut acrylic

Cable Length: 3M

## PRODUCT SPECIFICATION

**Light Source:** 1 x Max 70W E27 (excluded)

**IP Code:** 20

**Dimming:** Dimmable via mains phase dimming.

**Dimensions:** **Ø450** - Ø45cm, Height: 28.8cm  
**Ø600** - Ø60cm, Height: 36cm
