PRODUCT DESCRIPTION

Designer: Richard Sapper

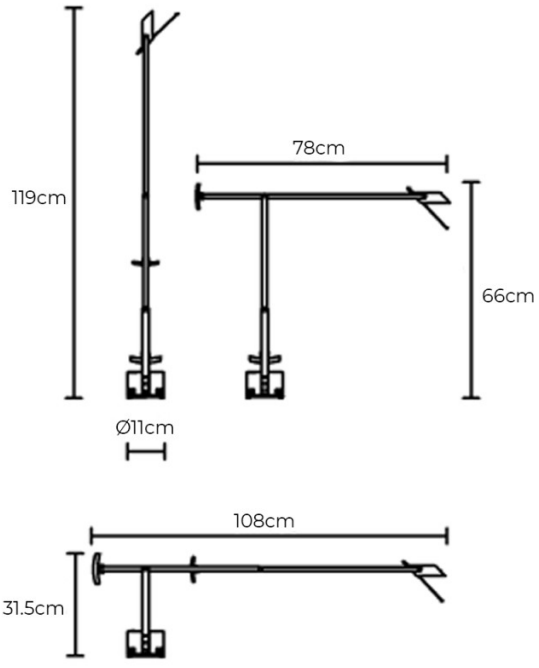

Artemide Tizio LED Table Lamp

Featuring an integrated LED light source, this version of the Artemide Tizio Table Lamp is functional and efficient. Designed by Richard Sapper in 1972, the Tizio LED Table Lamp boasts the usual unique silhouette, diffuser and colour palette seen throughout the range. This task light provides direct task lighting that can be easily adjusted and fixed in place thanks to the counterbalanced arms.

This award-winning design is an exceptional solution for offices and workspaces, offering functional illumination and a stylish aesthetic. Because of its unique design, no cables are required within the aluminium structure; the low-voltage current is simply carried along the conducting arms of Tizio itself. The integrated microswitch dimmer allows you to further personalise the lighting output and create the ambience you require, perfect for creating a cosier atmosphere for late nights at your desk. The **Tizio Collection** includes a floor stand to make your Tizio Lamp even more adaptable.
