PRODUCT DESCRIPTION

Designer: Poul Henningsen

Louis Poulsen PH Louvre LED Pendant Light

Designed by Poul Henningsen, the PH Louvre Pendant was originally made for an Adventist Church in Skodsborg, Denmark. The pendant light is made from 13 separate shades, which are mounted into a beautiful globular shape. These shades help create a glare-free light, producing shadows that cast throughout the room in a soft and welcoming manner.

The design of the Louis Poulsen PH Louvre Pendant is based on a light called the Spiral, which Henningsen made in 1942. A more simplified version, the PH Louvre was released in 1957, being a timeless piece that is still stylish and stunning in the modern day. Useful for many settings, this luminaire can be used alone or in multiples for more dramatic interiors to provide an effective and ambient glow throughout the room, thanks to its unique design and integrated LED light source.

The PH Louvre LED pendant is available in 2 colour temperatures, either 2700K (warmest white) or 3000K (warm white). Please contact us for more details.

PRODUCT SPECIFICATION

Light Source:	96W, 2700K, 2741 Lumens
IP Code:	20
Dimming:	Dimmable via Dali dimming systems or dimmable via Bluetooth. Please consult your electrician; additional wiring may be required on-site.
Dimensions:	Shade: Ø60cm Shade Height: 65cm Cable Length: 400cm
