PH Louvre LED Pendant Light by Louis Poulsen

Designed by Poul Henningsen, the PH Louvre pendant was originally made for an Adventist Church in Skodsborg, Denmark. The pendant light is made from 13 separate shades which are mounted into a beautiful globular shape. The shades help create a glare-free light, producing shadows that cast throughout the room in a soft and welcoming manner.

The design of the pendant is based on a light called the Spiral which Henningsen made in 1942. A more simplified version, the PH Louvre pendant light was released in 1957, being a timeless piece that is still stylish and stunning in the modern day. Useful for many settings, the pendant lamp can be used alone or in multiple to provide an effective and ambient glow throughout the room, thanks to its unique design and integrated LED light source.

The PH Louvre LED pendant is available in 2 colour temperatures, either 2700K (warmest white) or 3000K (warm white). It is also available in 2 dimming options, being dimmable via Dali dimming systems or dimmable via bluetooth. Please [contact us](#) for more details.

Designer: Poul Henningsen

IP Code: 20

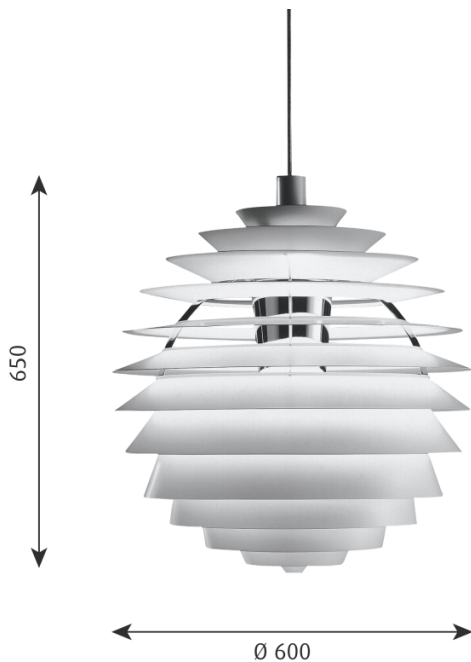

Dimming: Dimmable via Dali dimming systems or dimmable via bluetooth. Please consult your electrician, additional wiring may be required on site.

Dimensions:

Ø60cm shade

65cm shade height

Colour: White
