### PH 3/2 Table Lamp by Louis Poulsen

The PH 3/2 table lamp is a gorgeous light that creates a warm, soft glow, perfect for many settings. The lampshade is made from 3 glass parts, a system that was first designed by Poul Henningsen in 1925. The shade conceals the light source and each layer softens the light as it shines downwards, creating a diffused glow that wonderfully fills the room.

The table lamp can be used in many rooms, perfect for putting on tables, side tables, desks and shelves. The PH 3/2 table light comes in 3 lovely finishes, black, brass or chrome, to find the right look for your space. A timeless and iconic table light, this lamp will never go out of fashion and will add a touch of comfort and style to your interior.
