PRODUCT DESCRIPTION

Designer: Morten Voss

Atomheart P1 Suspension, designed by Morten Voss 2008.

Atomheart has been created with inspiration from the Sci-Fi design universe, where everything is possible and nothing is unconceivable. As such Sci-Fi and Atomheart are a tribute to imagination as one of mankind's most important qualities. The lamp itself is a fantasy over the classic presentation of the atom, where the paths of the particles form concentric lines around the nucleus and together sketch out a dynamic spherical body.

Made of hand-blown acid frosted opal glass in three layers, which encircle the light source all the way round and are crowned by a white high-gloss suspension. A black textile cord leads out from the centre of this circle forming a contrast to the white look of the pendant.

When the lamp is lit, the design of the shade forms contrasts which enhance the impression of the form of the glass, where no two angles are alike, but change all the way round. So the lamp appears as a complex and distinctive light source with a life of its own.

Lamp included.

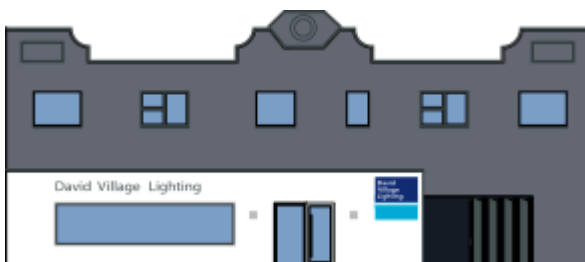

Please note the main image shows 2 individual P1's and 1 individual P2 separately suspended.

PRODUCT SPECIFICATION

IP Code: 20

Dimming: Dimmable via mains phase dimming
