PRODUCT DESCRIPTION

Designer: Arne Jacobsen

Louis Poulsen AJ Eklipta Ceiling / Wall Light

Originally designed for the Rødovre Town Hall by Arne Jacobsen, the AJ Eklipta Wall/Ceiling Light is a classic and iconic luminaire that is made from opal glass with a discrete metal mount. The diffuser is shaped into a circle, giving the illusion of a luminous globe which sits beautifully on your wall or ceiling. The glass diffuses the light and creates a warm glow, which creates a wonderful atmosphere in your interior.

The AJ Eklipta Ceiling/Wall Lamp can be used in many spaces, such as corridors, lounges, bedrooms or dining areas, being easily used on the ceiling or wall to provide a decorative and functional light feature. The light is available in 3 sizes, the smallest being Ø220, which was later developed by Jacobsen for St. Catherine's College at Oxford University. You can mix and match sizes to create a gorgeous pattern or use them alone for a simpler look.

The Louis Poulsen AJ Eklipta Ceiling / Wall Light is also available in an integrated LED version.
