PRODUCT DESCRIPTION

Designer: Arne Jacobsen

AJ Eklipta Ceiling / Wall Light by Louis Poulsen

Originally designed for the Rødovre Town Hall by Arne Jacobson, the AJ Eklipta wall/ceiling light is a classic and iconic light that is made from opal glass with a discrete metal mount. The diffuser is shaped into a circle, giving the illusion of a luminous globe which sits beautifully on your wall or ceiling. The glass diffuses the light and creates a warm glow which creates a wonderful atmosphere in your interior.

The AJ Eklipta ceiling/wall lamp can be used in many spaces such as corridors, lounges, bedrooms or dining area, being easily used on the ceiling or wall to provide a decorative and functional light feature. The light is available in 2 sizes, the smaller Ø220 which was later developed by Jacobsen for St. Catherine's College at Oxford University, and the larger Ø450, so you can find the right fit for your space. You can mix and match so sizes to create a gorgeous pattern or use alone for a more simple look.

This light is available in an integrated LED version. Please [click here](#) to find out more.
