PRODUCT DESCRIPTION

Designer: Nicola Gardin

Fabbian Flow Wall Light

The Fabbian Flow Wall Light features a conical diffuser crafted from 24% lead crystal glass and boasting a conical form. This shade is the main focus of the wall light and is available in either a transparent or white finish, both offering varying levels of diffusion. The transparent shade allows more light to escape and provides a more functional illumination, whereas the white-painted shade provides more cover and results in more ambient light.

The chrome detailing and wall mount of the Fabbian Flow Wall Light offer a luxurious and elegant touch to the lighting solution. Flow can be displayed individually to brighten up smaller spaces or in rows for larger spaces or longer corridors. This wall light is a great way to illuminate hallways, corridors, entryways, bedrooms, and kitchens in residential homes. It is also suitable for commercial interiors such as hotels, restaurants, reception areas and galleries.
