PRODUCT DESCRIPTION

Designer: Philippe Starck & Eugeni Quitllet

Kartell La Marie Chair

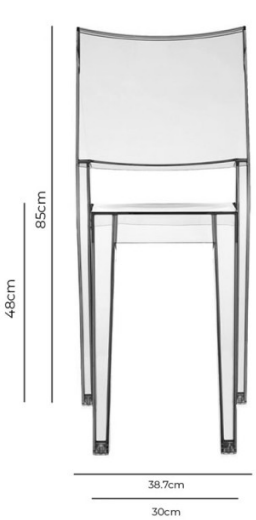

A 1999 design by Philippe Starck, the La Marie was the first ever completely transparent designer chair produced by a single polycarbonate mould. La Marie is the end product of meticulous research on the material; the use of polycarbonate makes the design shock-resistant and durable for daily use.

An ingenious design that brings out the beauty and attributes of the La Marie with lightness and elegance in its design. The chair is available in a transparent finish and can be used around the dining room table, in the garden or patio, but can also be utilised in commercial settings to add a unique contemporary touch to the surrounding settings.

Please Note: Due to the packaging process, La Marie Chairs must be ordered in a pair.
