PRODUCT DESCRIPTION

Designer: Ernesto Gismondi

Artemide Nur Pendant Light

Artemide Nur Pendant Light manifests its presence through a monolithic and mono-material body, with the essential and geometrically calibrated lines of a perfect parabola concealing an optical heart. Designed by Ernesto Gismondi, it provides general ambient lighting thanks also to indirect emission, with direct and indirect emission on Nur and diffused direct and indirect emission on Nur Mini.

On this page, the standard Nur and the smaller Nur Mini keep the same suspended form, but the proportions shift. Both are available in Anodised Aluminium and Anthracite Grey, both are formed in aluminium and glass, and accessory options include a coloured filter for Nur Mini, with a coloured filter and antidazzle cap listed for Nur.

Artemide Nur Pendant Light is available in standard Nur and Nur Mini sizes, in Anodised Aluminium and Anthracite Grey. The larger and smaller versions keep the same controlled profile, but sit differently once installed. Best suited for dining tables, kitchen islands, living spaces, and hospitality interiors where a pendant is needed for general ambient lighting with a defined overhead form.

Please note, A colour filter is available to purchase separately for the Artemide Nur Mini Pendant Light. Contact us for pricing and information.
