## PRODUCT DESCRIPTION

**Designer:** Enrico Franzolini & Vicente Garcia Jimenez

### Foscarini Big Bang Ceiling / Wall Light

A part of the Foscarini Big Bang collection, the Big Bang ceiling/wall light is a dynamic and artful light that evokes the motion of explosion. The shade is made from multiple plates which sit on a mount, constructed in a way to create a geometric shape that is captivating and compelling. The light escapes from the wall/ceiling light from many angles and reflects off the wall or ceiling to create a nice glow that is far-reaching and effective.

The Big Bang wall/ceiling light can be used in many rooms and will be a statement piece, making its mark in the space. Suitable for putting on the wall or ceiling, you can use one for a smaller space or several in larger areas to create a stunning impact. Available in 2 finishes, this light will not disappoint and will be a talking point, whether lining the corridor or on the office ceiling.
