## PRODUCT DESCRIPTION

**Designer:** Alberto Meda & Paolo Rizzatto

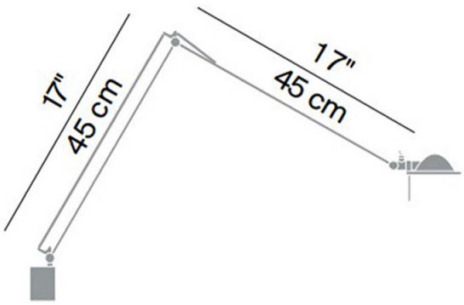

### Luceplan Berenice 45 Wall Light.

The Berenice 45 Wall Light is available in either a aluminium or a black finish, with a collection of coloured diffuser options. This light is an elegant contemporary classic, harnessing award winning and innovative design, whilst remaining easily adjustable and surprisingly compact. This wall lamp from the Bernice collection ensures you can bring light to exactly where it is needed whilst saving as much precious space as possible. The lamp hosts an easily adjustable body that generates extensive movement - creating a direct light source and making it a perfect task light. The Berenice 45 Wall Light is a must have addition to your office or any other workspace.

Berenice operates with a transformer that allows low tension current to reach the bulb through the rods without electrical cable, thus leaving its figure slender and elegant. Thanks to a special distancer fitted into the lower part of the head, the light can be brought very close to whichever subject requires illuminating. A simple touch of the head ring, which is well insulated and independent from the bulb housing, will also orient the light in any direction.

## PRODUCT SPECIFICATION

| | |
|---|---|
| **Light Source:** | 1 x Max 10W GY6.35 (excluded) |
| **IP Code:** | 20 |
| **Dimming:** | Integrated on/off switch on the product. |
