PRODUCT DESCRIPTION

Designer: Alberto Meda & Paolo Rizzatto

Luceplan Fortebraccio Floor Lamp

The Fortebraccio Floor Lamp was designed by Paolo Rizzatto and Alberto Meda and is currently manufactured in Italy. The long-lasting and environmentally friendly materials make it a leading product on the market. The main selling point for the Fortebraccio Floor Lamp is the vast mobility it offers, the lamp boasts two steel arms that are fitted with central joints in order to grant full flexibility and fluidity of movement, this makes the Fortebraccio an incredibly functional light. A subtle but powerful task light, the Fortebraccio Floor Lamp is designed to produce an astonishing level of light efficiency. This task light saves energy without affecting functionality.

Whilst the stripped back design of this light is impressive, the most striking feature is the handle. Not only does it give the table lamp a unique element, it is also crafted from ergonomic, polycarbonate, so it is possible to fluidly move the Fortebraccio lights seamlessly without having to touch the light source. The handle also holds the integrated dimmer, meaning you can personalise the light intensity to suit your needs.

This floor lamp makes a great reading light next to your sofa or in your office or other workspace.
