PRODUCT DESCRIPTION

Designer: Alberto Meda & Paolo Rizzatto

Luceplan Fortebraccio Table Lamp

The Fortebraccio Table Lamp was designed by Paolo Rizzatto and Alberto Meda and was launched as the first product in the Fortebraccio collection in 1998. The long-lasting and environmentally friendly materials make it a leading product on the market. The main selling point for the Fortebraccio Table Lamp is the vast mobility it offers, the lamp boasts two steel arms that are fitted with central joints in order to grant full flexibility and fluidity of movement. The central joints allow the lamp to move both horizontally and vertically, this makes the Fortebraccio an incredibly functional light.

A small and elegant task light, the Fortebraccio Table Lamp is designed for your workspace to produce an astonishing level of light efficiency with an energy demand of below 8W. This task light saves energy without affecting functionality.

Whilst the stripped back design of this light is impressive, the most striking feature is the handle. Not only does it give the table lamp a unique element, it is also crafted from ergonomic, polycarbonate, so it is possible to fluidly move the Fortebraccio lights seamlessly without having to touch the light source. The handle also holds the integrated dimmer, meaning you can personalise the light intensity to suit your needs.

PRODUCT SPECIFICATION

Light Source:	1 x Max 42W HSGSA E27 (excluded)
IP Code:	20
Dimming:	Integrated dimmer on the product.
Dimensions:	Height: 44cm Head: Ø16cm Base: Ø23.6cm Cable Length: 225cm
