

Luceplan Goggle Wall

LA9107

SOURCE: <https://www.davidvillagelighting.co.uk/product/luceplan-goggle-wall/9308>

Iridescent colours and reflections for a wall lamp inspired by the shape of swimming goggles and the mirror treatment of sports eyewear lenses. Goggle is an elliptical lamp in opaline polycarbonate that can be fixed to the wall at a normal or tilted angle, singly or in rows, to create a lively cluster of lights.

The colour variation of Goggle's flat surface is created solely by the different angle from which it is observed. The lamp's colour changes are in fact caused by an iridescent film that exploits in-mould decoration technology to become an integral part of the diffuser.

Designer: Ross Lovegrove

Lamp type:

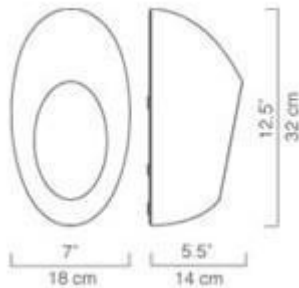

Golfball (1x)

60watt 230v

Cap: E14 SES

Colour: Iridescent
