PRODUCT DESCRIPTION

Designer: Francisco Gomez Paz & Paolo Rizzatto

Luceplan Hope Wall Light

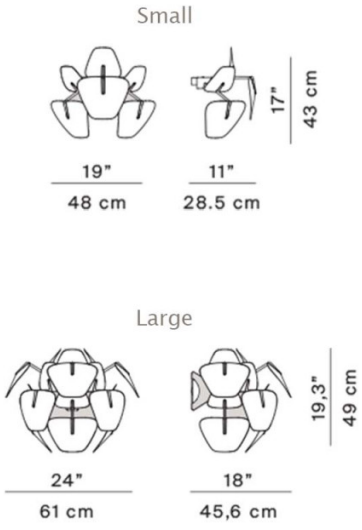

Designed by Francisco Gomez Paz & Paolo Rizzatto, the Hope Wall Light creates a sophisticated atmosphere in your space. This luminaire performs a modern take on traditional lamps, providing up to date technology and contemporary materials. This wall light does require assembly upon delivery, but is both light and easy to piece together. The shade of the lamp is curated from extremely thin Fresnel lenses, which reflect the light upon each other when turned on, giving it the appearance of a large sparkling diamond on your wall. The lenses increase the distribution of light, meaning you are not sacrificing functionality for a striking design - and you can recreate the effect of glass, without the limitations. As unlike traditional glass or crystal fixtures the Fresnel lenses are much less fragile.

The wall light by Luceplan provides a cosy atmosphere and exceptional lighting. With such innovative style and crucial functionality it is no surprise that the Hope Wall Light by Luceplan has received a large array of awards. The Hope has been prised with the Red Dot Award, the Compasso d'Oro, the Good Design Award as well as the Premio dei Premi per l'Innovazione.

All lights in the Hope Collection will require assembly, assembly instructions included.

PRODUCT SPECIFICATION

Light Source:	**Small:** 1 x Max 120W HDG R7s (excluded) **Large:** 1 x Max 20W HSGSA E27 (excluded)
IP Code:	20
Dimming:	Dimmable via mains phase dimming.
Dimensions:	**Small:** Depth: 28.5cm Width: 48cm Height: 43cm **Large:** Depth: 45.6cm Width: 61cm Height: 49cm
