PRODUCT DESCRIPTION

Designer: Ross Lovegrove

The light for your home garden, the terrace, spaces around the swimming pool or… for the vegetable garden. Pod Lens is high, low, stuck into the ground, in bunches or festoons on the branches of trees.

The diffuser, reminiscent of natural forms like those of flower buds, is made entirely of polycarbonate, with over-moulded walls that make the lamp waterproof and its colours resistant to ultraviolet rays. It also an electrically versatile lamp that takes both energy-saving bulbs and normal incandescent ones. Inside the house, when raised on a high stem with aluminium base, it becomes a lightweight floor lamp. Pod Lens is delivered without a plug because, due precisely to its adaptability, it may require an IP65 plug (for outdoor use), a normal one (for indoors), or a special three-way joint for series connections.

Available in three different finishes:

- Sage Green with green cable
- Grey with green cable
- Teracotta with teracotta cable

PRODUCT SPECIFICATION

Light Source: 1 x 14W LED E27 (excluded)
IP Code: 65
Dimensions: 28.5 x 10.5 cm lampshade
