PRODUCT DESCRIPTION

Designer: Brodie Neill

KDLN Clover LED Suspension

The Clover is a modern suspension light that is made of an expertly molded polyurethane matt varnished body with an aluminum reflector. The open, enveloping, intriguing three-dimensional structure is reminiscent of the natural design of a clover. The integrated LED light source is placed at the heart of the enveloping clover leaves creating a play of light reflections on the internal surfaces. This makes the light output appear more than it is as the one light source is reflected on the large leaf-like surfaces.

This LED suspension light by KDLN would be the perfect addition to a modern stylish interior that needs a soft indirect lighting solution. The design of this suspension is well thought through and unique, a stunning addition to any home or commercial space.
