Artemide

NUR Mini Ceiling by Artemide

Nur Mini ceiling light adds a decorative touch in any interior, both residential or commercial. The characteristic dome-shaped shade emits a soft, diffused light complimenting any space. The lights were designed by the father of Artemide, Ernesto Gismondi, who revolutionised the lighting design all over the world.

Nur Mini Ceiling is available in the same colour options as the rest of the collection; either a matt aluminium or anthracite grey or if you prefer a glossy finish, the lights are available in a gloss white or glossy black colour. The [Nur Collection](#) also includes a pendant light, available in three sizes, or you can explore the integrated LED Nur Lights.

Designer: Ernesto Gismondi
